

PRAVEEN PARIMI

Principal Business Analyst | Business Process Optimization | Enterprise Transformation

Contact: praveenba3@gmail.com | +91 9121680907 | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Results-driven **Principal Business Analyst** with 21+ years of experience, including 15+ years in Business Analysis and Process Optimization, driving enterprise transformation across **Insurance**, **Finance**, and **Telecommunications** for **Fortune 100** clients such as Nationwide and AT&T. Delivered AI/ML-driven process-mining and predictive-analytics pilots achieving up to 20% efficiency gains, and led nine full-lifecycle implementations that realized **7% cost savings** and **30% faster delivery** through Agile practices. Skilled at translating complex requirements into scalable, value-driven solutions using **BABOK** and **Six Sigma** best practices and balancing innovation with operational excellence with growing exposure to decentralized ecosystems and emerging Web 3.0 models.

CORE SKILLS

- **Business Analysis & Documentation** – Requirements Gathering, BPMN/UML, Gap Analysis, BRDs/FRDs, NFRs, User Stories, Smart Contract & Blockchain Use-Case Definition.
 - **Process Optimization** – Workflow Re-engineering, Process-Mining (Blueworks Live), Predictive Analytics, Decentralized Process Mapping (Web 3.0).
 - **PMO Governance & Portfolio Management** – Framework setup, program tracking, strategic alignment.
 - **Vendor Governance & RFPs** – RFQ/RFP Management, SaaS Evaluation, Blockchain Solution Assessment.
 - **Budget Oversight** – Portfolio budget tracking, cost optimization, resource planning.
 - **Tools** – MS Visio, Blueworks Live, Salesforce, iGrafx, Adobe XD, Liferay, Tableau, Qlik, JIRA, Confluence, MS Project, Lucidchart, ArchiMate, IBM BPM/MDM, SAP CRM, Ethereum (Basic).
 - **Delivery Models** – Agile, Waterfall; Risk Management, Stakeholder Engagement, Decentralized Product Lifecycle Planning.
 - **Collaboration** – Slack, Zoom, Teams, Miro; cross-time-zone leadership
-

ACHIEVEMENTS

- **AI/ML-Driven Process Mining** – Designed and piloted proofs-of-concept using Blueworks Live exports, uncovering workflow bottlenecks and reducing cycle time by 15%.
 - **Delivered 7% cost savings** in policy administration modernization at AAA Insurance.
 - **Accelerated delivery by 30%** through Agile adoption and process streamlining.
 - **Led remote vendor evaluations** for Salesforce, IBM MDM, and IBM BPM, reducing implementation risk.
 - **Enabled 20% fewer outages** by defining anomaly detection requirements at AT&T.
-

PROFESSIONAL EXPERIENCE

Principal Business Analyst

Berry Ads & Branding, Hyderabad, India | Nov 2019 – Present

- Led cross-functional Agile teams to streamline product development, increasing delivery speed by 30%, and **piloted exploratory blockchain-based PoCs for client engagement and ad transparency**.
- Defined product vision and roadmap, delivering multiple new features ahead of schedule, **including early research into NFT-based brand loyalty and decentralized content ownership**.
- Recruited and mentored business analysts and UX designers to improve processes and address operational challenges.
- Delivered remote requirements, UX reviews, and backlog prioritization across marketing, dev, and client teams in 3 time zones, **introducing cross-functional awareness of emerging Web3 marketing models**.
- Used Jira, Confluence, and Slack for async updates, ensuring on-time delivery without direct supervision.
- Established sprint reviews and retrospectives, improving stakeholder communication and team alignment.

Principal Business Analyst | Lead Business Process Consultant

The American Automobile Association (AAA), Glendale, Arizona | Feb 2017 - Jan 2019

- Transitioned project methodology from **Waterfall to Agile**, improving collaboration and accelerating delivery by **20%**.
- Streamlined **vendor architecture** by **retiring redundant systems**, cutting costs by **7%**.
- Defined requirements and led design sessions for a new **policy administration system** using **iGrafx** and **Adobe XD**, improving process efficiency and user satisfaction.
- Coached and guided **three cross-functional IT teams**, enhancing **analyst–stakeholder partnerships**.
- Led remote Agile ceremonies and sprint planning sessions with distributed teams in the U.S. and India, bridging time zones and documenting requirements in **Jira** and **Confluence**.

Lead Business Analyst | Product Manager

Apollo Education Group, Phoenix, Arizona | Apr 2016 - Nov 2016

- Led **12 analysts** to enhance **CRM** and **POS systems**, improving for operational efficiency.
- Facilitated **daily stand-ups** and **sprint retrospectives**, using effective communication to remove obstacles
- Authored **business cases**, **project plans**, and managed **UAT** with **SMEs**.
- Reviewed and recommended **architectural** changes based on **technology**, **technical debt** and **business requirements**.
- Managed **UAT** with SMEs to ensure solutions met business requirements.
- Developed **data visualizations** using **Tableau** to represent complex data sets for executive decision-making.

Lead Business Analyst | Product Manager

Nationwide Mutual Insurance Company, Phoenix, Arizona | Jul 2012 - Mar 2016

- Designed and piloted **AI/ML-driven process-mining proofs-of-concept** using **Blueworks Live exports**, uncovering workflow bottlenecks and reducing cycle-time by **15%**.
- Managed **RFQ/RFP processes** and evaluated SaaS solutions to secure stakeholder buy-in.
- Created **flowcharts**, **workflow diagrams**, and **As-Is/To-Be scenarios** using **MS Visio**, **Blueworks Live**, and **BPMN**, reducing cycle-time by **40%**.
- Authored **Functional and Non-Functional Requirements Documents (FRDs/NFRs)** and captured requirements as **Use Cases** and **User Stories**.
- Developed **wireframes and mockups** with **Pencil** and **iRise** to facilitate UI/UX design reviews.
- Assisted in creating **Conceptual** and **Logical Data Models** to support system architecture.
- Led **data mapping and migration** from seven legacy systems into a new CRM platform leveraging **IBM BPM** and **IBM MDM**.

Lead Business Systems Analyst | IT Product Manager

AT&T, Seattle, Washington | Apr 2011 - Jun 2012

- Acted as liaison between **marketing**, **operations**, and **technical teams** for AT&T's inaugural **mobile apps**.
- Gathered **historical performance data requirements** and partnered on **anomaly-detection models**, that helped forecasting outages and reducing unplanned downtime by **20% (up to 40% potential)**.
- Created **flowcharts** and **workflow diagrams** using **MS Visio**.
- Translated business needs into **system requirements**, delivering Functional Specification Documents.

Note: Earlier roles (2004–2010) as Web developer, Java developer, System Analyst etc.

EDUCATION

- **Bachelor of Technology (B.Tech)** in **Information Technology** from University of Madras, Chennai, India.
